

# Wildlife Jeopardy

## **Activity Description: Wildlife Jeopardy**

How fast can a tiger beetle run? What is Nebraska's only marsupial? How many hearts does an earthworm have? What Nebraska fish species builds a nest for its young? The answers to these questions and more can be found out when your class plays Wildlife Jeopardy. Through this interactive activity we will discuss fun facts about Nebraska animal species and learn fun facts about some of the weirdest creatures out there!

## **Wildlife Jeopardy Outline – Live Zoom**

- Introduction of instructor f and the Nebraska Game and Parks Commission
- Introduce the concept of wildlife jeopardy
  - Have teacher divide students into 2 different teams
  - Explain rules and how each team will take turns picking categories
  - How scoring works
  - How “stealing” questions and points work
- Play jeopardy until about 5 minutes left then finish scoring
- Have students ask questions if they have any
- Talk about how teachers can use Wild What's Up if they have more questions during the year
